F-16 BLOCK 25/30/32 MODIFICATIONS (Hoskins/Learn)

DESCRIPTION OF EFFORT

Among many modifications to the Block 25/30/32 F-16, some of AFRC's higher priority efforts include:

- -Color Multi Function Display (CMFD) a more reliable display processor with the capability of displaying color
- -ALR69 antenna reconfiguration to increase electronic warfare threat detection range
- -Commercial Central Interface Unit (CCIU) for increased reliability and capability of the current Advanced CIU Program Assessment:

Green

ISSUES

 The CMFD is to be combined with the development schedule purposes CCIU for If one slips, the other will continue on its own
